

Global Network Architecture

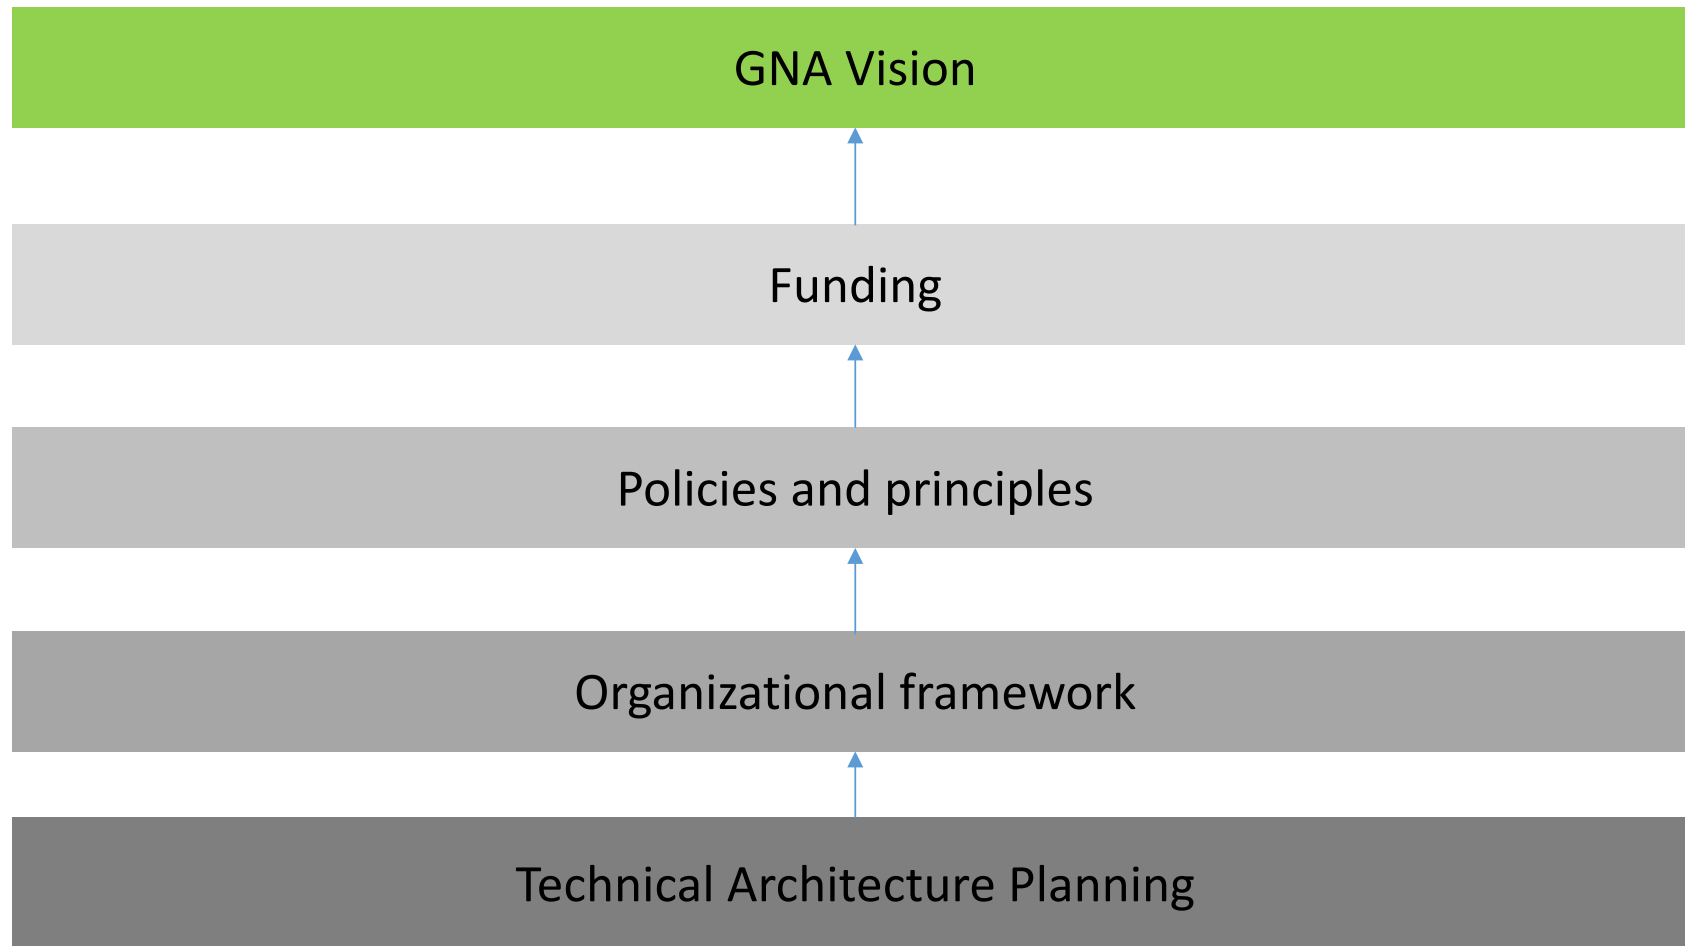

An inclusive Blueprint for a Global R&E Network Interconnect

Washington, DC, USA – 26 April 2017

Presented by: René Buch (CEO, NORDUnet)

The GNA Vision:

- Globally Connecting Science, Research & Education;
Assuring that bandwidth and services in support of research and education between continents is equivalent to that within continents.

The GNA Mission:

- Creating an inclusive “architecture” to increase collaboration and resource sharing between the global R&E community maximizing utilization of funds
- Developing an strategic blueprint that R&E Networks can use to align their investments in intercontinental circuits

Global Network Architecture Vision

global network architecture

The GNA Vision

Drag  to explore the timeline
↓

TIMELINE

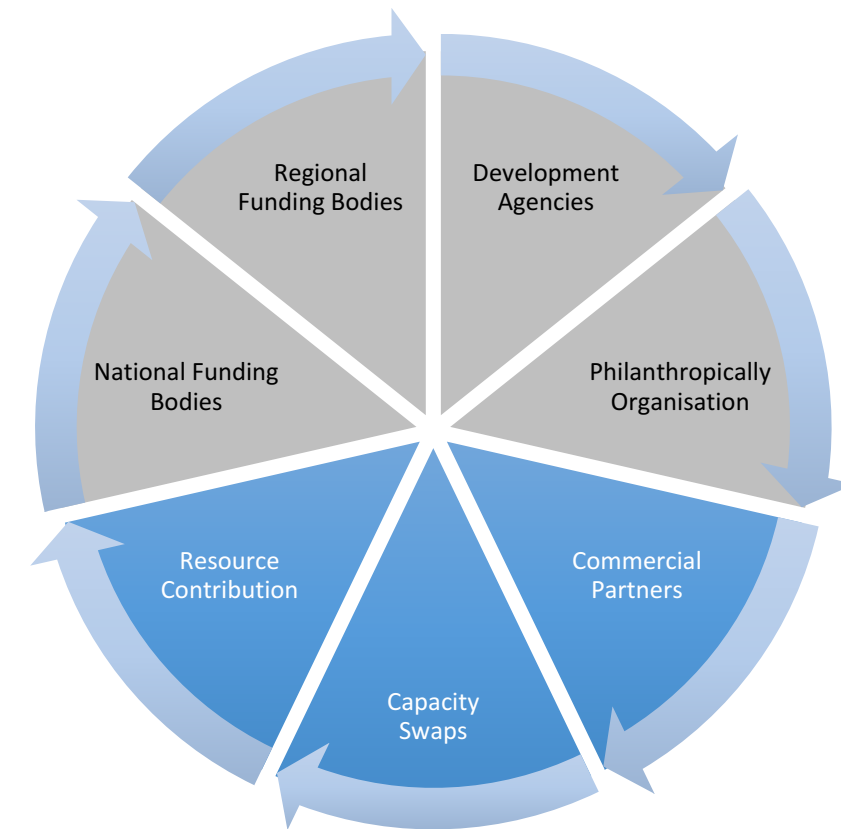

Funding the GNA encompasses:

1. Contributions:

- National and Regional Network contributes capacity/links/GXPs in accordance with the GNA Technical Architecture
- Capacity Swaps
- Commercial Partners

2. Funding for Expanding existing Footprint:

- National and Regional Funding Bodies
- Development Agencies
- Philanthropical organisations

Why the GNA Matters

global network architecture

- Science and Education are increasingly global
- Science and Education are increasingly collaborating globally
- Science depends on global shared instrumentation
- Data and Computation - the need to move and correlate data are increasing exponentially
- Significant infrastructure at global scale is necessary to support these trends
- The current global intercontinental R&E network infrastructure has developed through bi-lateral single project investments.
- A coherent architecture and collaborative investments and implementations is the only way to meet future demands efficiently at a cost efficient way.

The Policies & Principles of GNA

global network architecture

- **Participation:**

- Contribute Resources
- Contribute to and Comply with GNA Architecture Documents
- Adhere to Policies & Practices

- **Restrictions**

- State your limitations – AUP

- **Fair use**

- Usage and contributions by GNA partners must reflect a fair and equal use principle
- GNA is a common endeavour where partners contribute the resources in a way that benefits the common good

- **Behaviour**

- The GNA collaboration is based on trust and open discussion between partners
- Members work towards the common goal and should strengthen national, regional and international reach by continuous discussion and engagement between all relevant partners

The GNA Framework is an open forum that includes:

1. **GNA Technical Working Group (GNA-TWG)**
 - An open forum where all GNA interested partners can contribute and to the GNA framework with:
 - Provisioning structure
 - Technical Standards
 - Operational Paradigms
2. **GNA Strategy & Policy Working Group (GNA-SPWG)**
 - An open forum where all GNA interested partners can contribute to the GNA framework within:
 - Strategy & Vision
 - Funding
 - Policies
 - Procedures
 - Behaviour

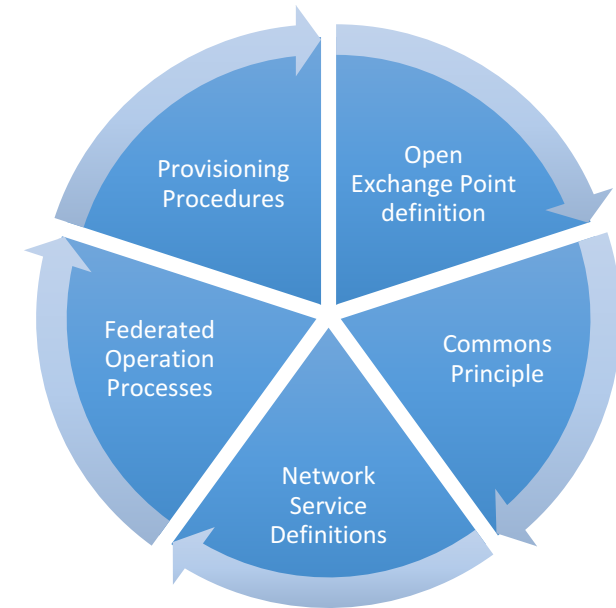

GNA Framework

Technical

Policy &
Strategy

- The GNA Technical Working Group is a open forum focused on the Technical GNA Architecture
- Interested partners can contribute to the GNA network architecture discussions and documents
- Work items include:
 - Provisioning procedures
 - Global Exchange Point definitions
 - Federated Operational Procedure
 - Network Services definitions
 - Commons principles and architecture
- Work is done through face to face meetings, VCs and via the mailing list

- The GNA Strategy & Policy Working Group is a open forum focused on the Strategy and Policy Discussion relating to the GNA Infrastructure
- Interested partners can contribute to the GNA Strategy & Policy discussions and documents
- Work items include:
 - Strategy & Vision
 - Funding
 - Policies
 - Procedures
 - Behaviour
- Work is done through face to face meetings, VCs and via the mailing list

- **GNA Technical WG:**

- **CEO Forum Executive Sponsors:**

- Dave Lambert (Internet2)
 - Christian Grimm (DFN)
 - Prof. Wu (CERNET)

- **Co-Chairs:**

- Erik-Jan Bos (NORDUnet)
 - Dale Finkelson (Internet2)

- **GNA S&P WG:**

- **CEO Forum Executive Sponsors:**

- Dave Lambert (Internet2)
 - Chris Hancock (AARNet)
 - René Buch (NORDUnet)

- **Co-Chairs:**

- TBD
 - TBD

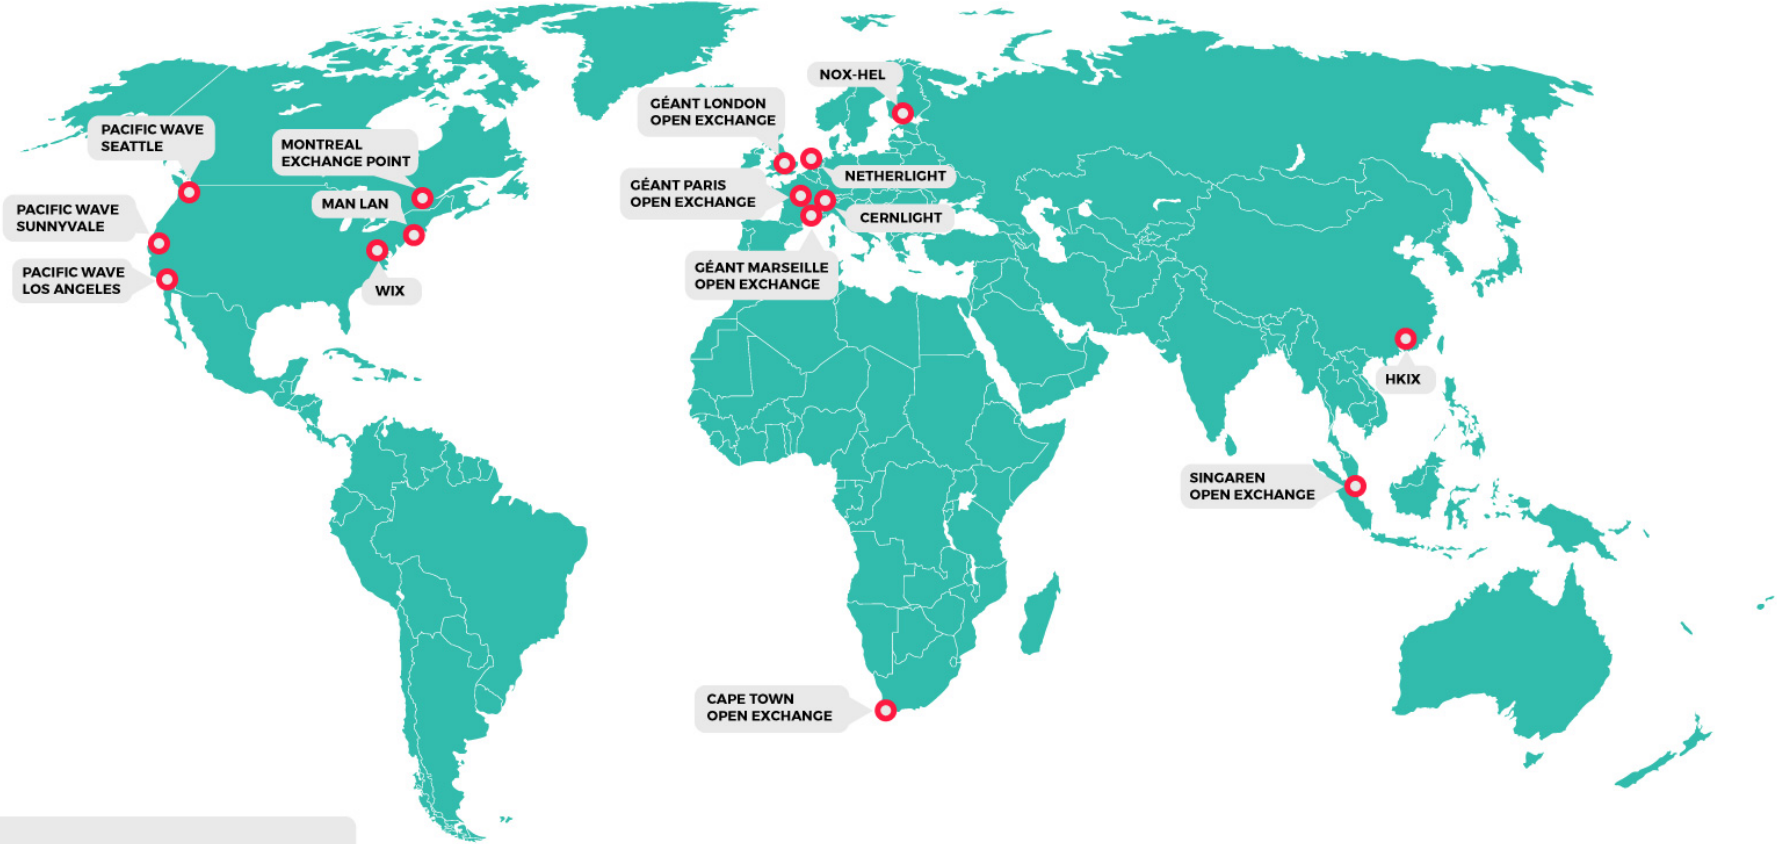

- The GNA concept has achieved near-universal buy-in
- The ‘Proof of Concept’ project (ANA) has proved successful and stable
- Consortia are developing (similar to ANA) in other regions
- The number of Global Exchange Points continues to grow
- Formal announcement of the GNA Phase One implementation at I2 Global Summit 2017, i.e. NOW!

GNA Phase I – GXPs

global network architecture

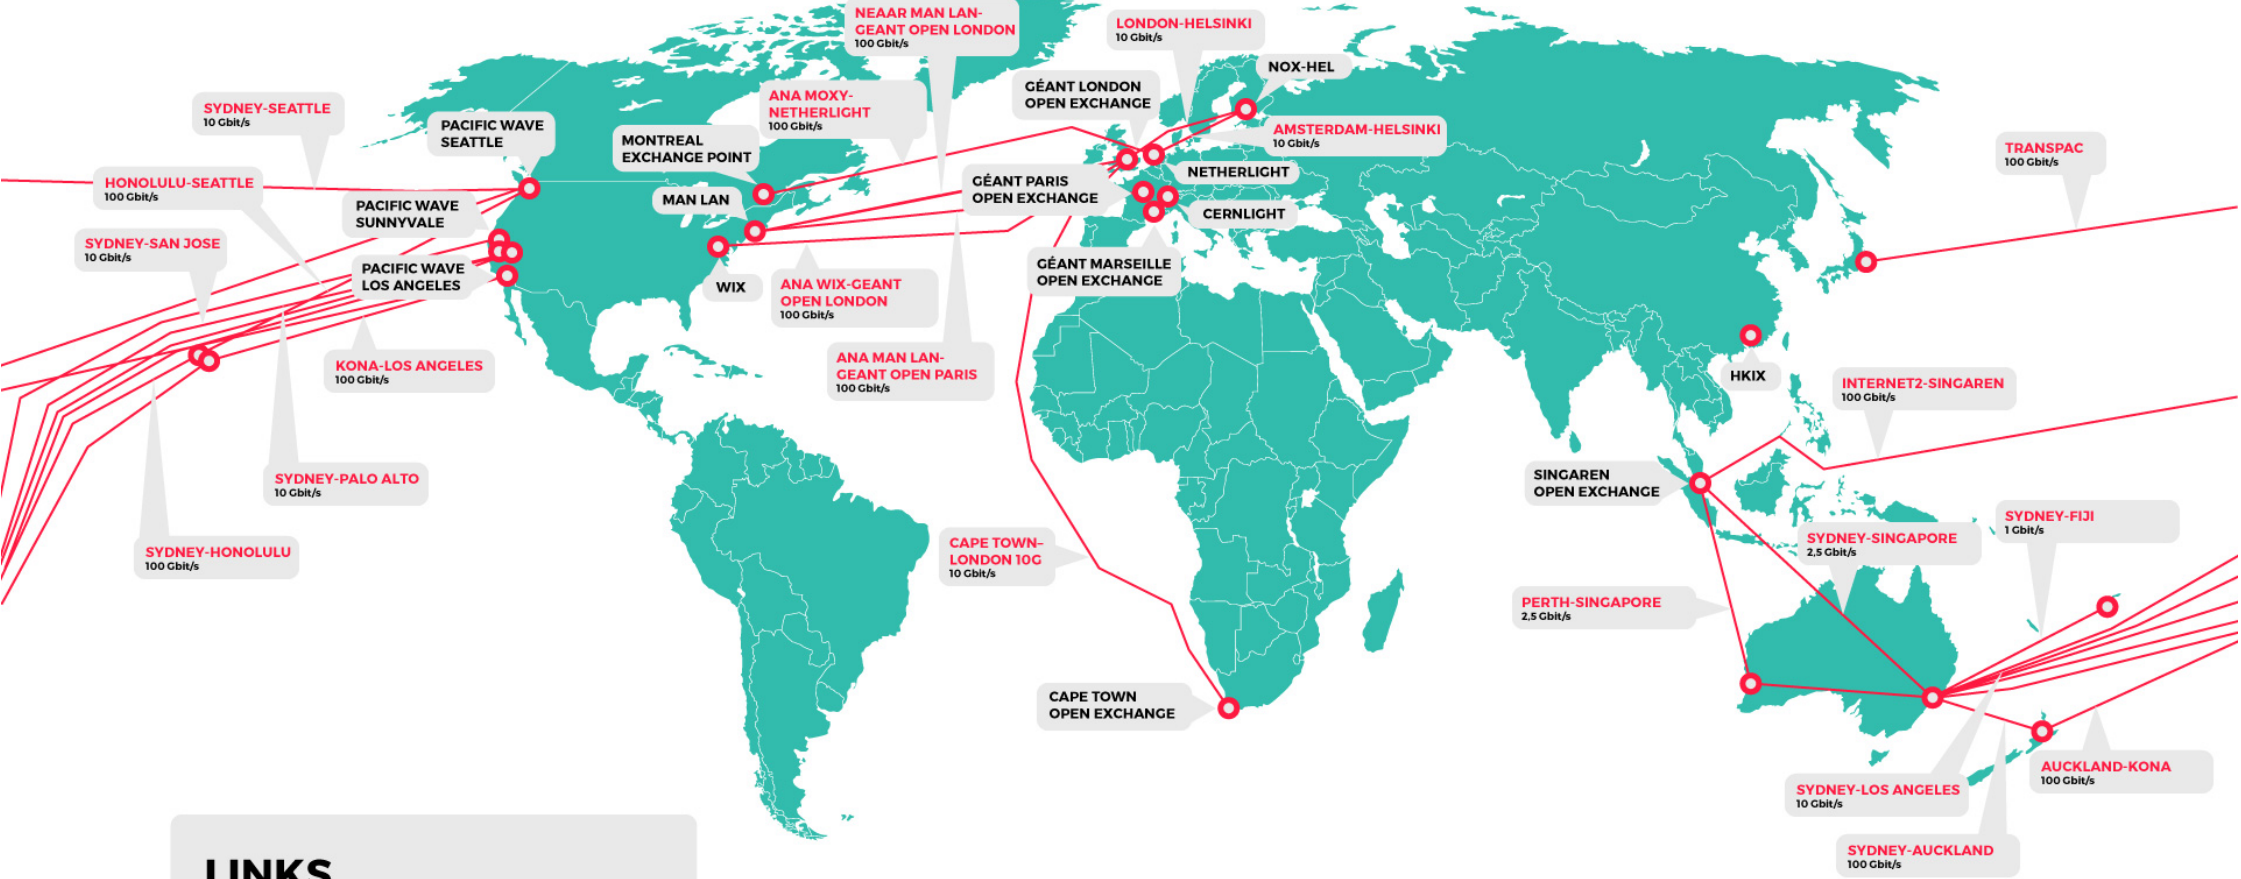

**EXCHANGE POINTS
IN THE GNA PHASE I**

GNA Phase I – GXPs & Links

global network architecture

**LINKS
IN THE GNA PHASE I**

- Formally publish technical architecture document as stable version 1.0
- Announce GNA Framework at the Global Summit in April
- Formally launch GNA Strategy & Policy WG
- Continue the work of the ‘Commercial Partners’ team
- Fund the creation of a ‘GNA Vision & Mission’ to support our communication activities
- Schedule and complete briefing meetings with current and potential government funding entities
- Schedule and complete briefing with the major global science instrument and project teams

Thank you! Questions?
